QUESTION OF	Elaborating disaster risk reduction and preparedness: Global warming and its effects on natural disasters
SUBMITTED BY	Japan
CO-SUBMITTERS	Congo, Russia, Cuba, France, South Africa, Columbia

Expecting that there is no possibility of immediate change throughout all nations and focus on the most important issues that cause severe global warming,

Recognizing that there is a threat to the entire world-specially coast countries-which endangers the living and life on earth for mankind,

Stressing that the bases for change have been set in the past concerning the reduction of Carbon dioxide in the air all around the world,

1. Calls upon all countries to join and continue the idea of the Kyoto Protocol with the utmost effort- Reaching the goals and the reduction ought to be one of the top priorities like it is in Japan,
2. Indeed emphasizes on the particular importance of the Kyoto Protocol and its goal to reduce the CO2 emissions,

Urges therefore especially the coast and earthquake-, flood- ,drought- and hurricane-endangered countries shall receive as much support as possible, being financially, research facilities, sending UN- Helping Troops and other support to (funded not only but also through penalties that are imposed by the CCA), including but not limiting to the content of the Kyoto Protocol:

1. Help those countries to restore and expand their protection against natural disasters and recover from them in order to keep up with the economic growth and Import/Export,
2. Help to detect threats early so the damage done can be minimized and conflicts arising from a situation like that can be solved,
3. Create and secure a safe better environment for mankind,
4. Tighten the global community,

Being confident that we, as the United Nations, are able to realize the urge of global warming and to create a better world for all nations, keeping in mind that;

1. We must be able to trust each other
2. Allow other countries to help in whatever extend they can but also should,
3. Offer all the power and abilities that we ourselves can offer to the world community,

Requests for more participation in trying to achieve the goals of the Kyoto Protocol and its bases and ideas and less interference from economic factors such as lobbyists (especially western countries),

Insist that the limit for the achievement for the Kyoto Protocol and the battle against global warming will be extended,

Establishing of the CCA (Climate Control Agency) in order to control in short term changes climate preservation and security.
